

Implementation of the paper “Preferential deletion in dynamic models of web-like network”

Name : Helena Julie Arpudaraj

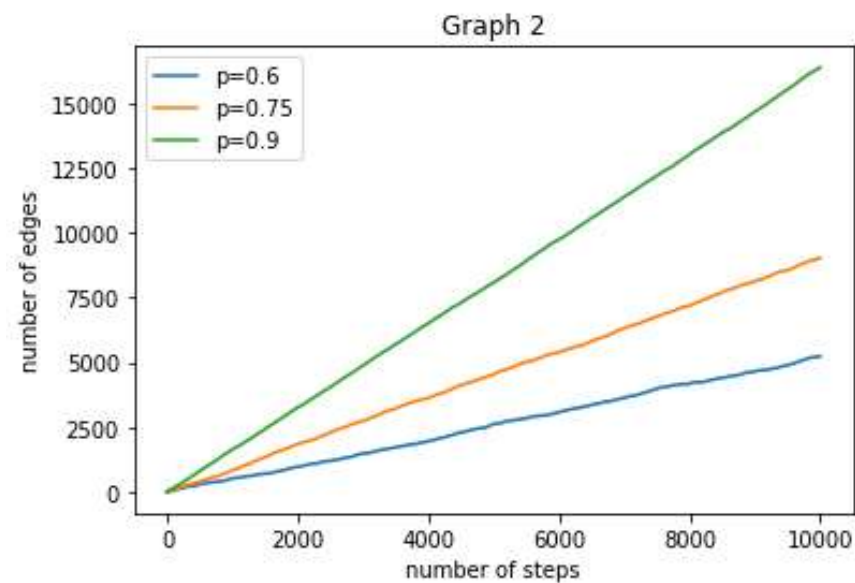

UCF ID : 4735186

Graph 1 - Growth in the number of nodes of graph G_t with the number of steps t , for three different values of the birth probability p .

Graph 2 - Growth in the number of edges of graph G_t with the number of steps t , for three different values of the birth probability p .

Graph 3 - Log-log plot of the cumulative degree distribution of the graph generated by the preferential deletion model.
